# PROBLEM STATEMENT

Traditional resume screening is manual, time-consuming, and biased. Existing ATS rely on basic keyword matching, missing contextual nuances. Key metrics like skills and experience are underutilized, leading to ineffective hiring.

## Objectives

- Develop an AI-based resume parsing and job matching system.
  - Implement weighted scoring for customizable criteria.
  - Ensure accurate and unbiased candidate ranking.
  - Provide an intuitive, user-friendly interface.
  - Enhance transparency with explainable AI features.
- 

# DATASET

- **Total Resumes:** 150
- **Key Columns:**
  - Personal Information: Name, Contact Email, Phone Number, LinkedIn, GitHub
  - Work Experience: Job Title, Company, Start/End Dates, Location, Responsibilities
  - Projects: Titles, Descriptions, Tech Stacks for 2 Projects
  - Skills: Proficient, Experienced, Familiar
  - Education: Degree, Institution, Graduation Year, GPA
  - Achievements: Notable accomplishments

## **Purpose:**

Comprehensive dataset covering all critical aspects for candidate evaluation and effective shortlisting.

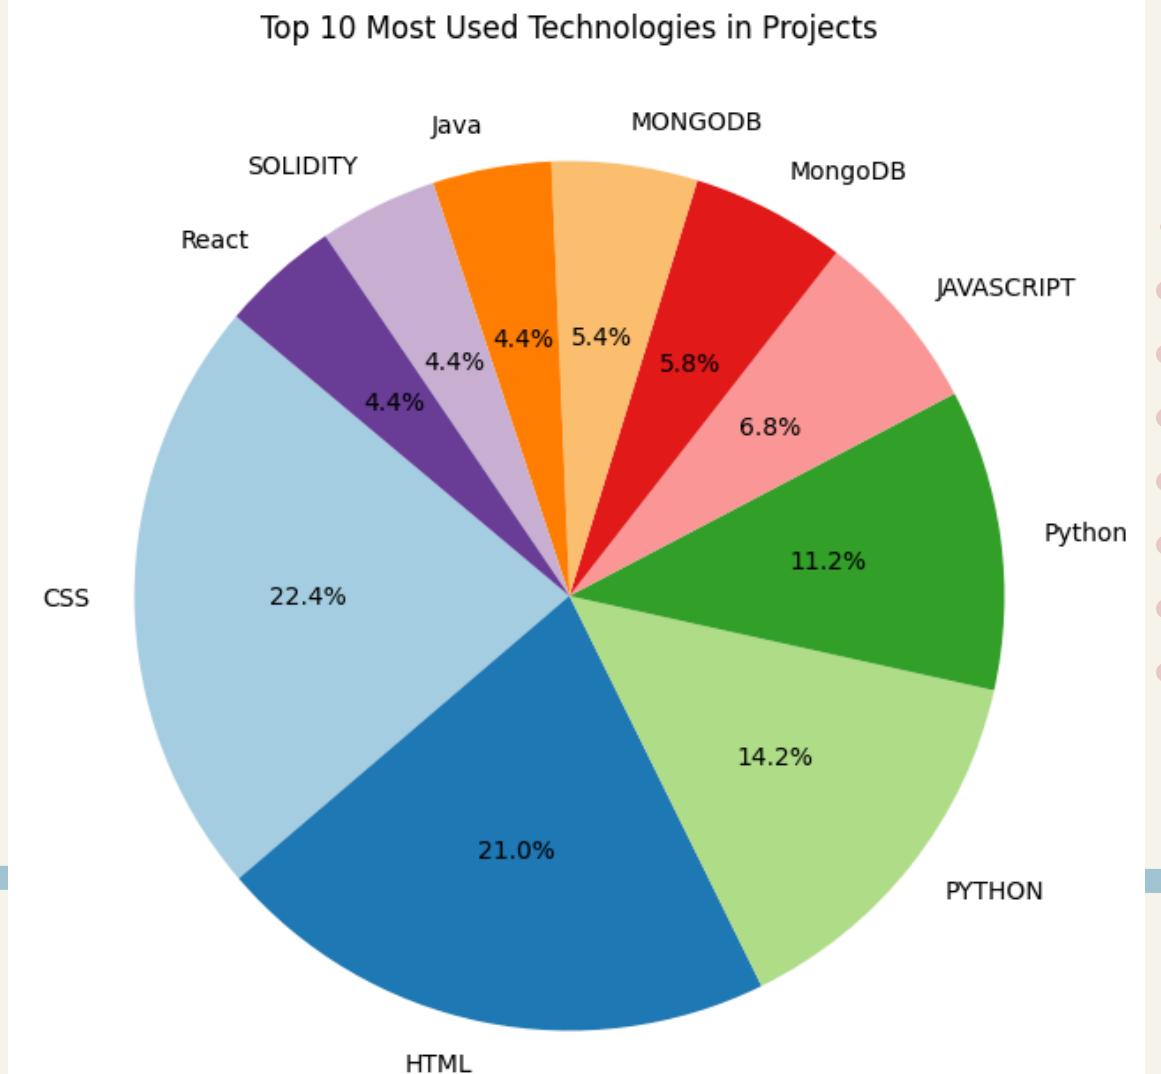

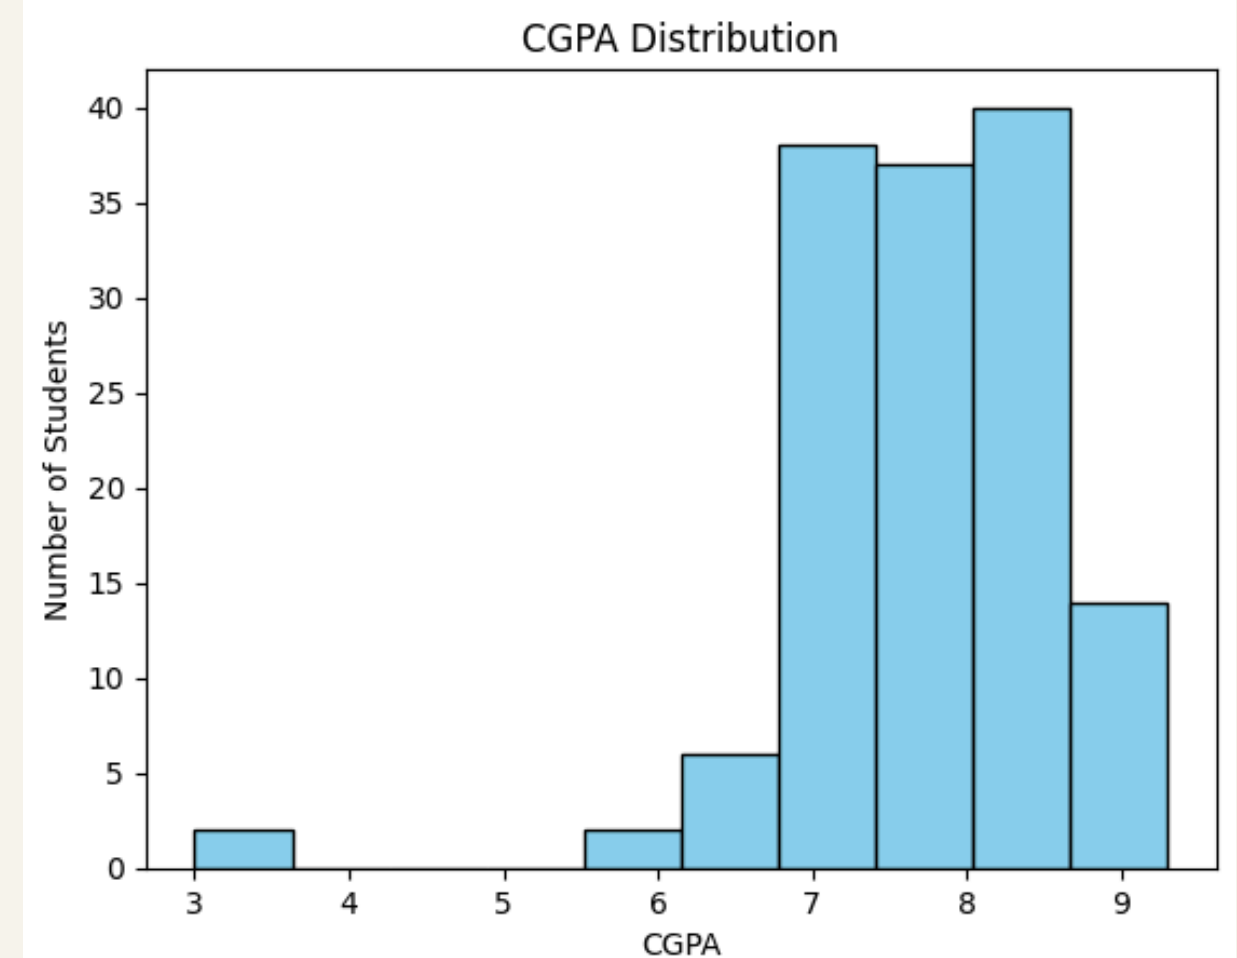

# EDA

## Top 5 columns with the most NaN values:

- GitHub Profile: 19 missing values
- LinkedIn Profile: 17 missing values
- Graduation Year: 17 missing values
- Achievements: 16 missing values
- Location (1st Experience): 14 missing values

1. HTML & CSS dominate web development with 22.4% and 21.0% usage, respectively.
2. Python (14.2%) and JavaScript (6.8%) are key for data science and web development.
3. Most students have a CGPA between 7 and 8.
4. A smaller number of students have a CGPA above 8.
5. Very few students have a CGPA below 5.

**BML Munjal University | 2024**

# ISSUES WITH OTHER MODELS

1

## Parsing Resume

When using NLP to parse data from resumes, we encountered issues with generating a consistent dataset due to discrepancies in PDF formats and varying alignments across CVs. This lack of uniformity in structure often led to misinterpretation or incomplete extraction of information.

Name	Email	Phone	LinkedIn	GitHub	Job Title 1st Exp	Company 1st Exp	Start Date 1st Exp	End Date 1st Exp	Location 1st Exp
Abhinav KasulaSeeking	abhinav.kasula.09@gmail.com	+91 9319615489				HTML, CSS,		PYTHON2022	
Aditya	adityaraj2002dav@gmail.com	990715 2141			Li- Mat Industries	Front End Developer	May 2022	July 2022	
Aditya RanaEndeavor	aditya.rana.20cse@bmu.edu.in	7818995363				BangaloreKarnataka			
Afraz Ahmed ZiaHighly		+91 8318817726				JAVA, GENETIC ALGORITHM, JS, MYSQL   UI/UX DESIGNER	2022May 2022	July 2022	UI/UX DESIGNER
Abhishek Sharma		020621			SMARTTER'S STUDIO	GROUP LEAD	May 2022	sharma 8950	REACTJS   NODEJS   NEXTJS   MONGODB

That's why we switched to GPT-4o-mini, an affordable solution that delivered significantly more accurate results, effectively handling the inconsistencies in PDF formats and CV alignments.

# ISSUES WHILE SHORTLISTING

1

## Using Gemini Model

While we tested and user Gemini model for achieving the same results, we encountered a serious issue there. Each time we fed the data to Gemini, it replied with names with alphabetical orders only.

	Name	Contact Email \
0	Rakesh Gupta Kotha	rakesh.guptakotha.20cse@bmu.edu.in

9	Sairamreddy Rajigiri	rsairamreddy555@gmail.com

# ISSUES WHILE SHORTLISTING

2

## Using NLP

BERT is also an NLP model, but results with NLP were different and not accurate. That was the reason we chose BERT over NLP. Cosine similarity of results was not good to be considered for shortlisting the resumes.

	Name	Contact Email	Skills - Combined	Similarity Score
20	Suvarsha Venumbaka	Suvarsha.venumbaka@gmail.com	C++ • SQL • Java • Python • CSS • HTML Python ...	0.131513

28	Utsav Sharma	utsav.dhariwal@gmail.com	C++, Java, Python, SQL, HTML, CSS C++, Python R	0.129556
52	Khushi Gupta	khushigupta27kg@gmail.com	Java, Python, C, SQL, JavaScript, HTML, CSS Ja...	0.128220
39	Yakkala Sri Praneeth	yakkala.sripraneeth.20cse@bmu.edu.in	Java, Python, SQL, HTML, CSS Python, Java, C J...	0.128220

# RESULT

Resume Parsing: Accurate results achieved using BERT and NLP models.

- Candidate Matching: Effective job-candidate matching with weighted criteria for better relevance.
- Gemini vs BERT: BERT outperformed Gemini, improving context understanding and ranking accuracy.
- Candidate Ranking: Customizable ranking based on recruiter-defined priorities, enhancing decision-making.
- Security & Privacy: Data protection standards met, ensuring privacy compliance.

# CONCLUSION

- AI-powered solution streamlines recruitment.
- Automates resume parsing and job matching.
- Enhances accuracy, transparency, and efficiency.
- User-friendly interface with customizable features.

# FUTURE OUTLOOK

- Multilingual Support: Expand to global audiences.
- Voice Interaction: Enable hands-free functionality.
- Behavioral Analysis: Evaluate candidates beyond technical skills.
- Cultural Fit Assessment: Align candidates with organizational values.
- Predictive Analytics: Forecast job market trends and success rates.

The background features three vertical stripes on the left: a wide pink stripe, a medium blue stripe, and a narrow beige stripe. The right side of the image is a light beige background with two rectangular areas of a pink dot pattern, one in the top right and one in the bottom right.
